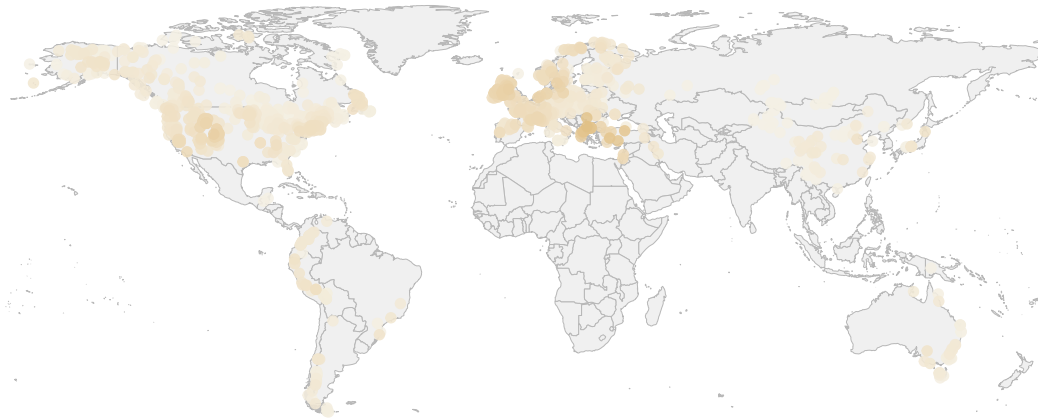
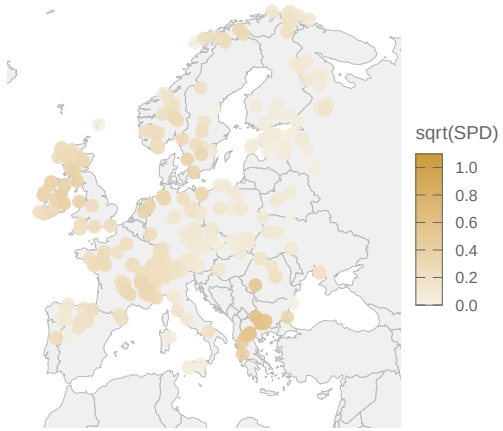
Matched human−impact proxies − 8 cal ka BP

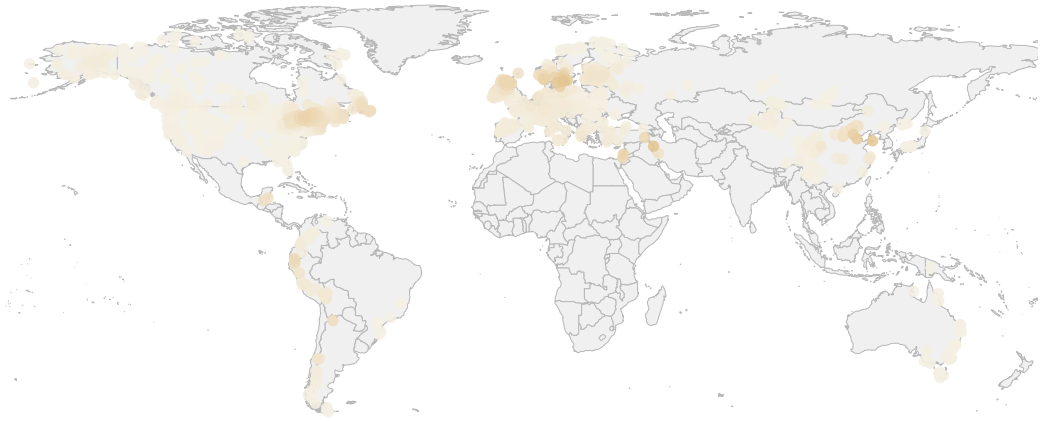
World (n = 1100)



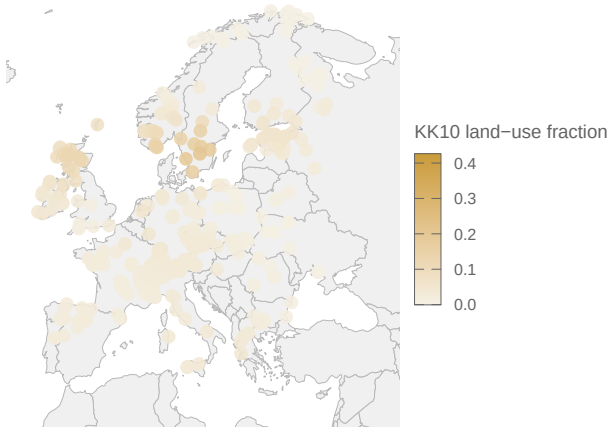
Europe (n = 376)



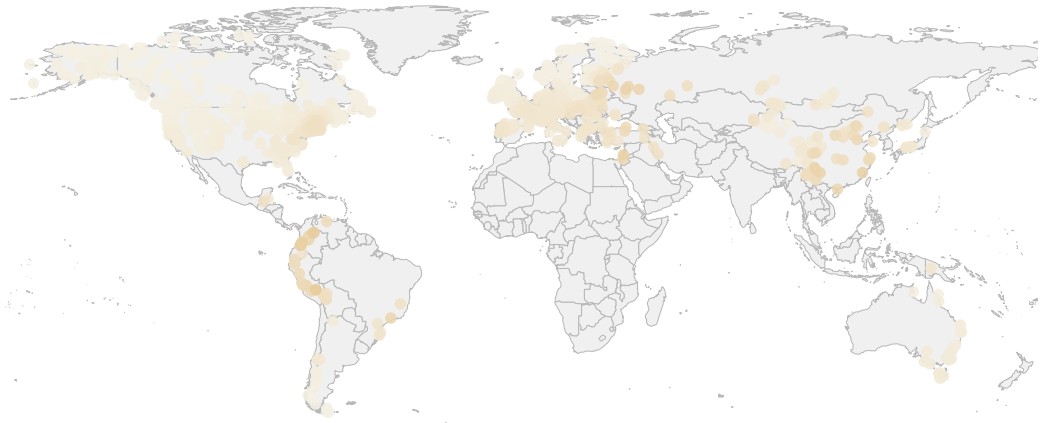
World (n = 1100)



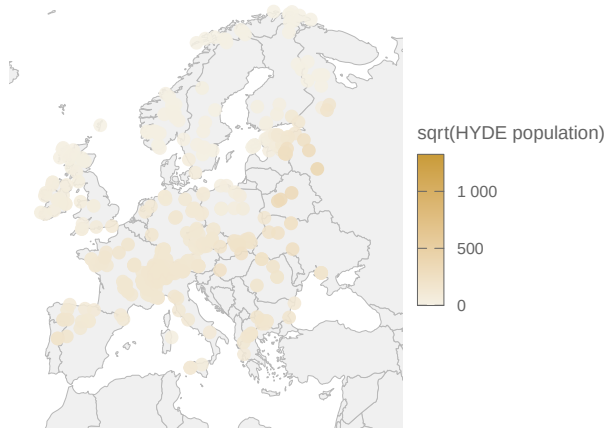
Europe (n = 376)



World (n = 1100)



Europe (n = 376)

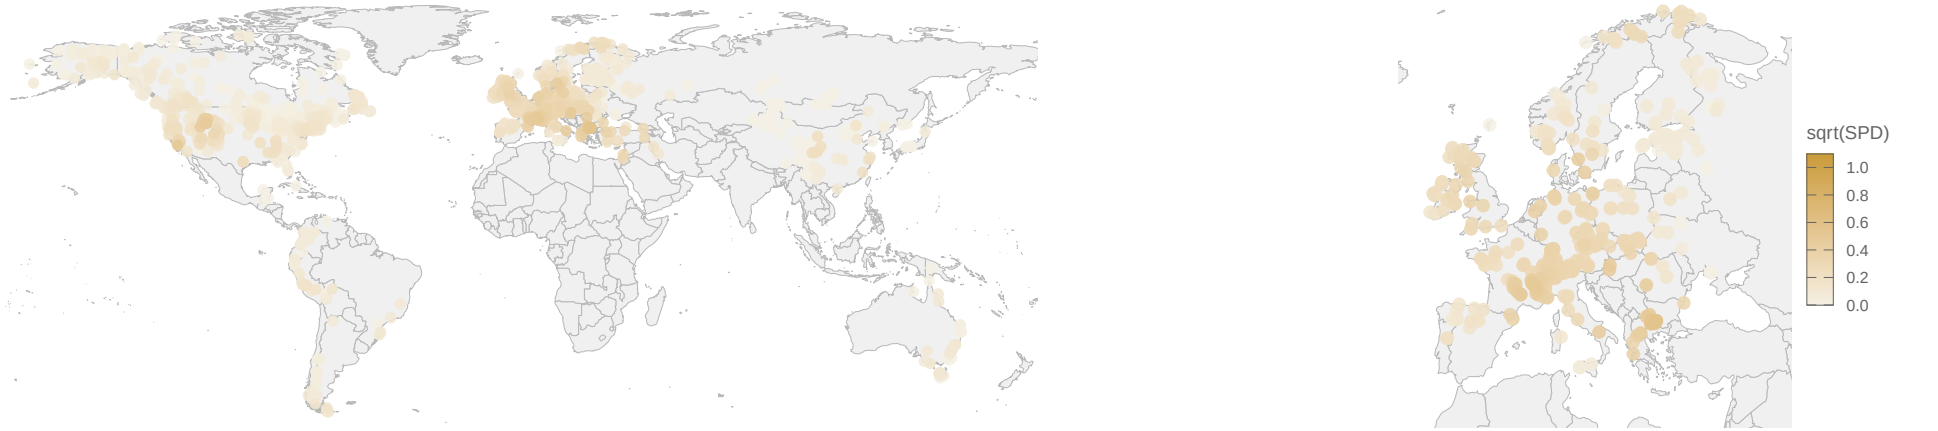


Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 7.5 cal ka BP

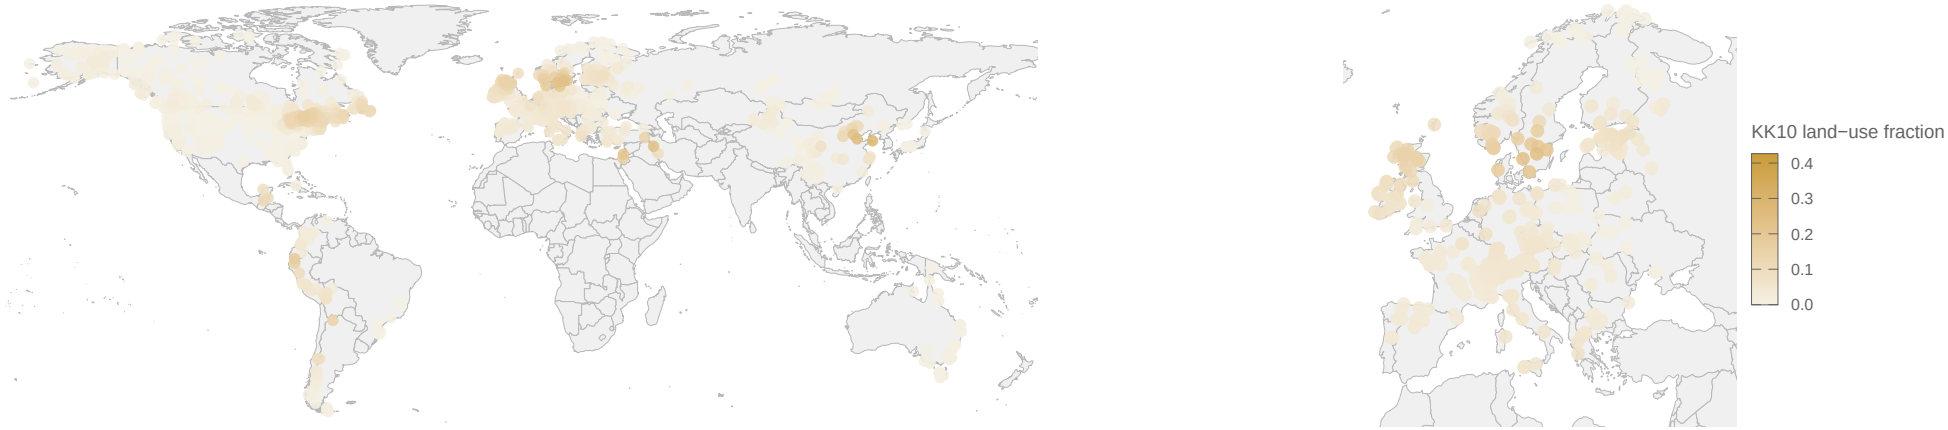
World (n = 1127)

Europe (n = 383)



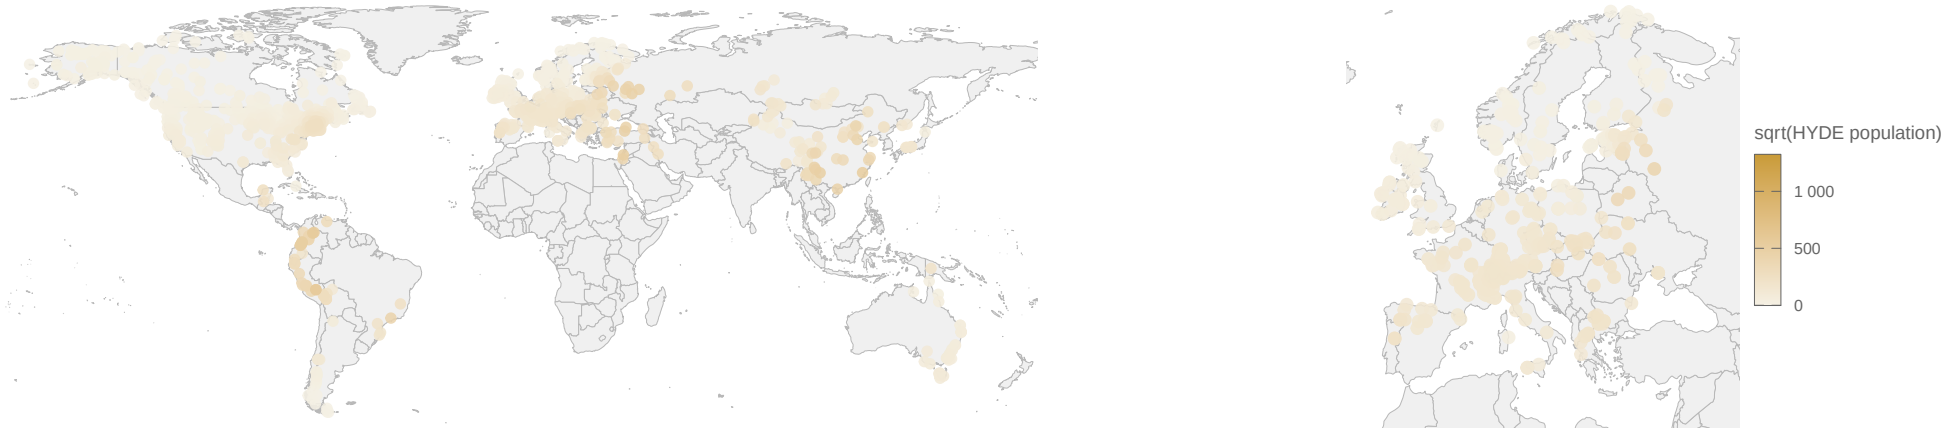
World (n = 1127)

Europe (n = 383)



World (n = 1127)

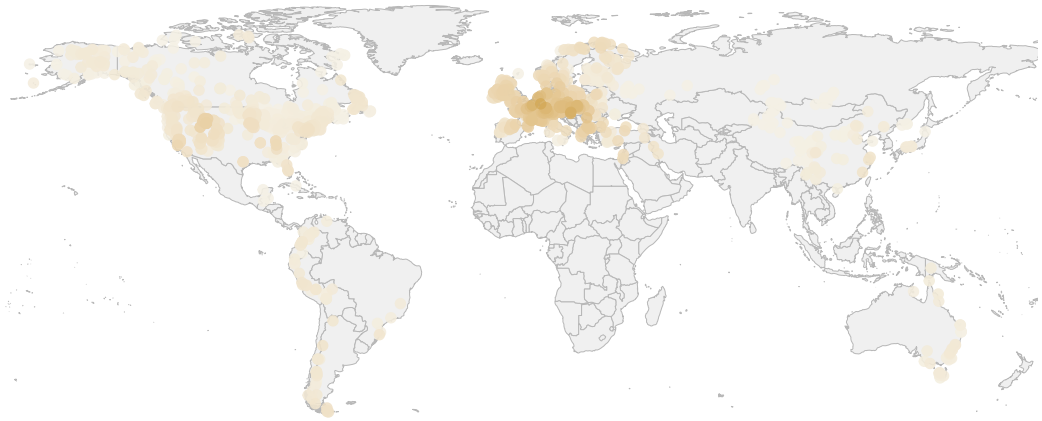
Europe (n = 383)



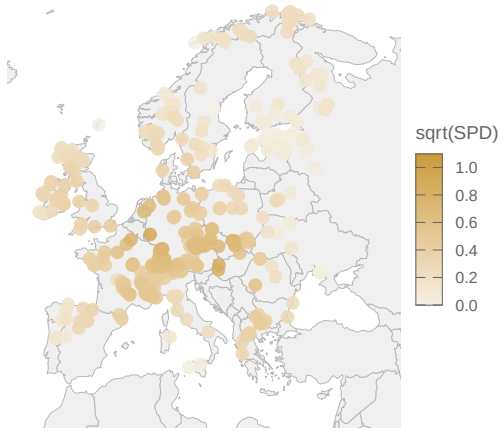
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 7 cal ka BP

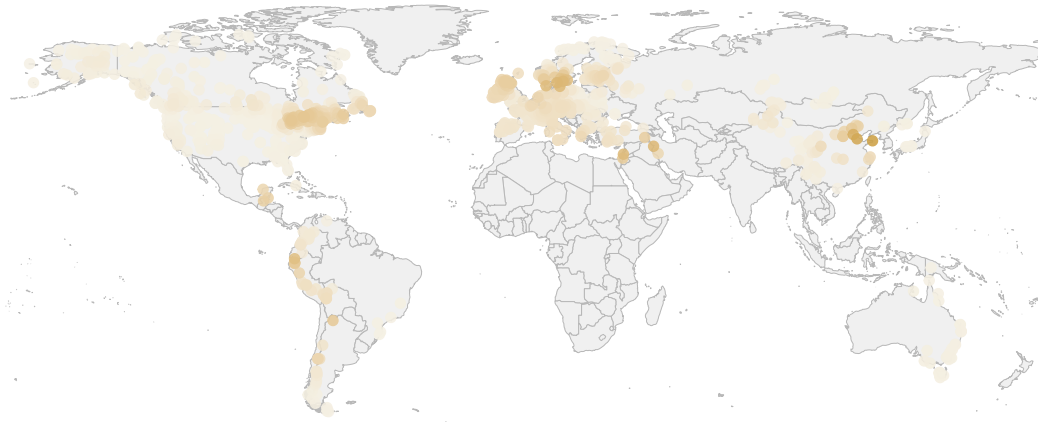
World (n = 1133)



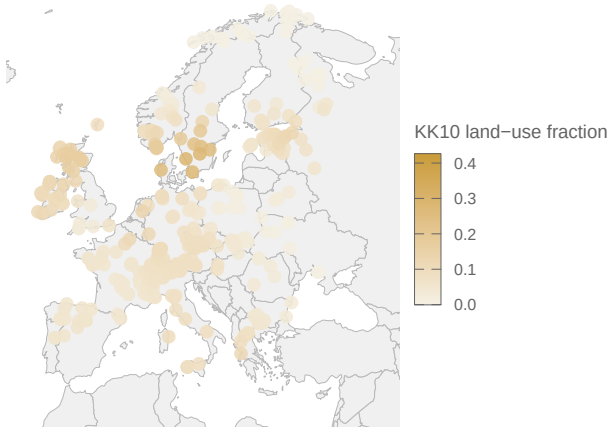
Europe (n = 388)



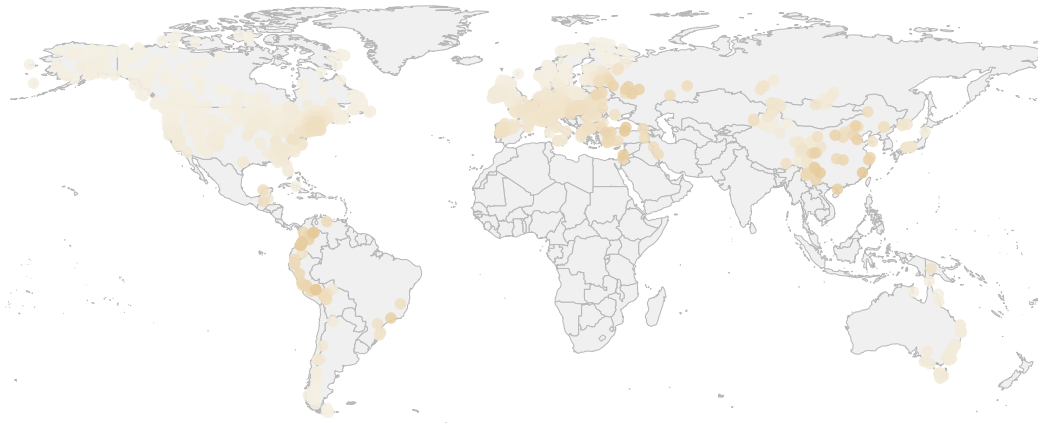
World (n = 1133)



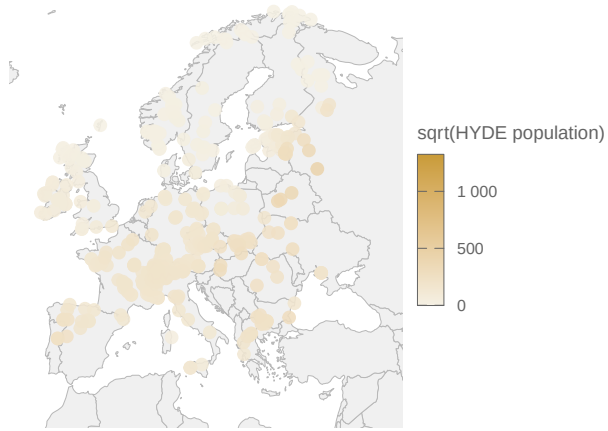
Europe (n = 388)



World (n = 1133)



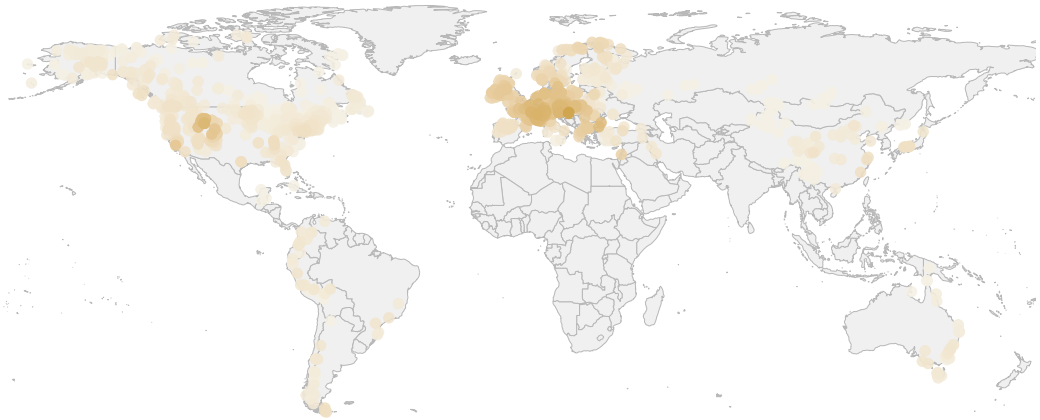
Europe (n = 388)



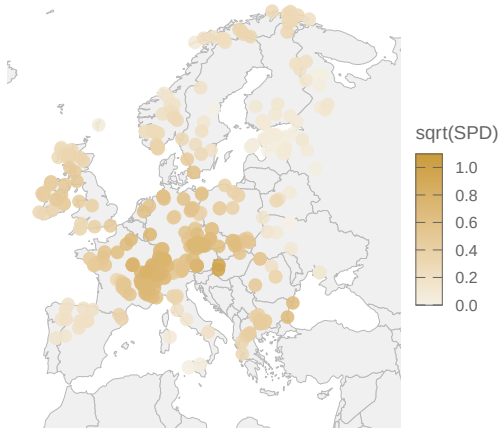
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 6.5 cal ka BP

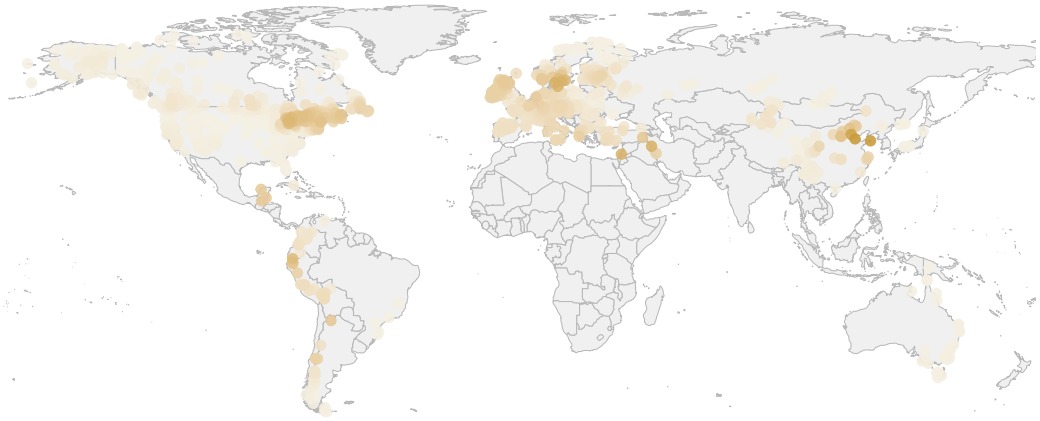
World (n = 1132)



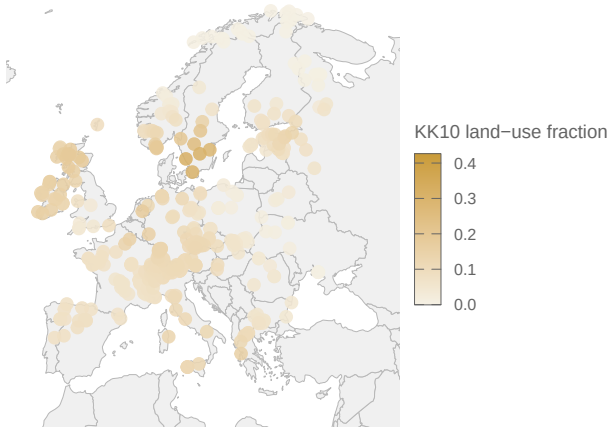
Europe (n = 380)



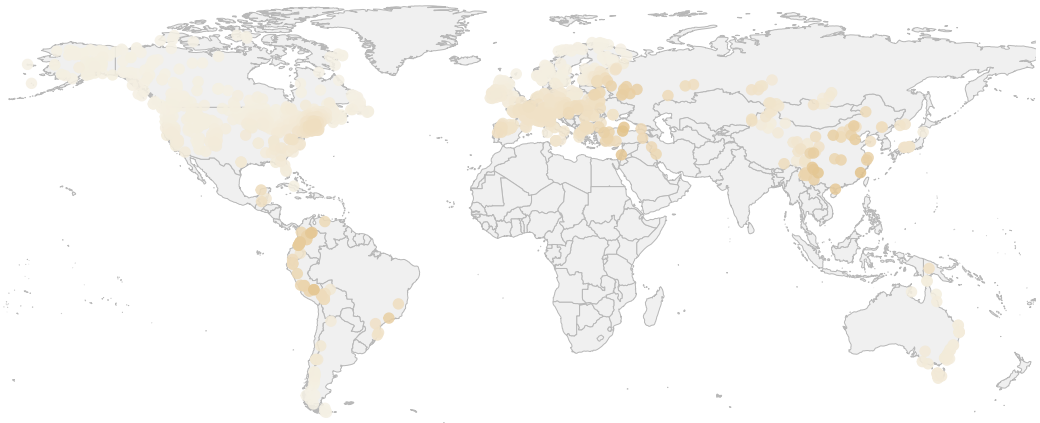
World (n = 1132)



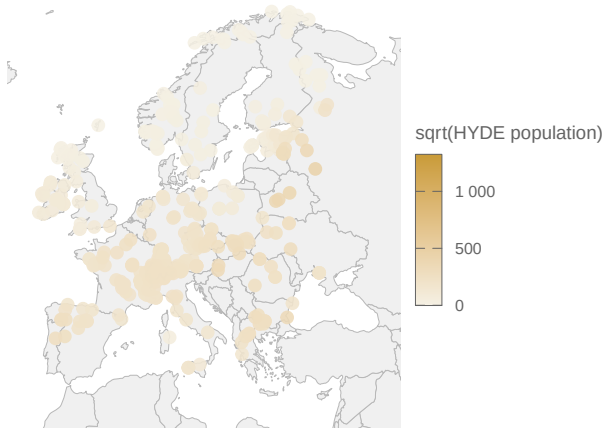
Europe (n = 380)



World (n = 1132)



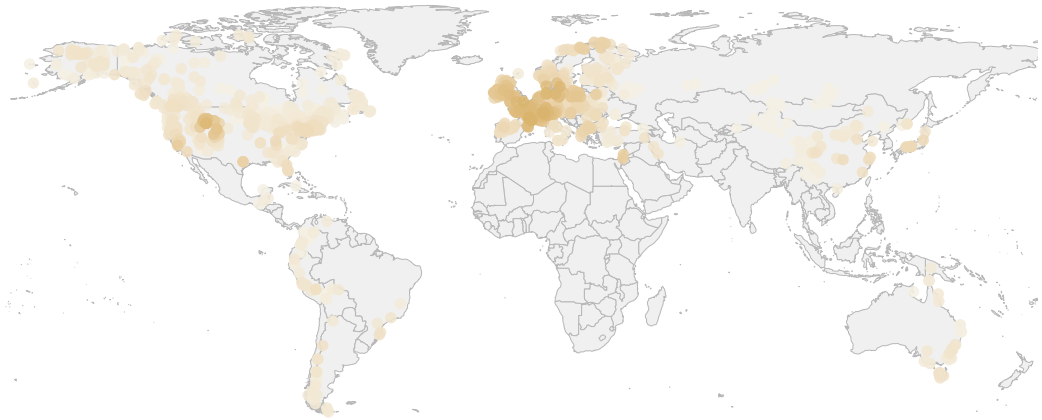
Europe (n = 380)



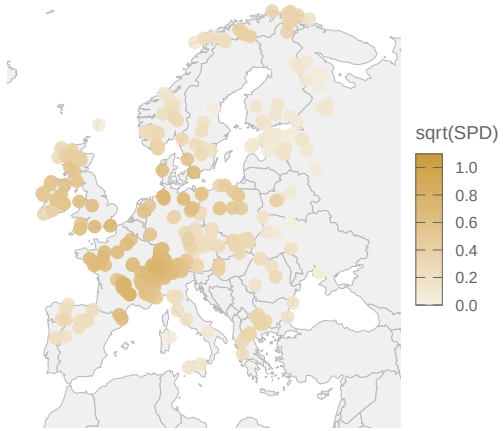
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 6 cal ka BP

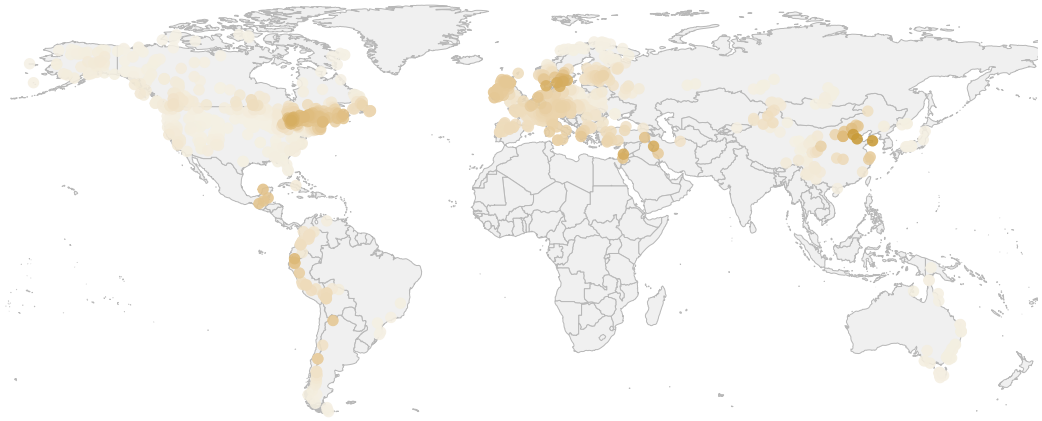
World (n = 1139)



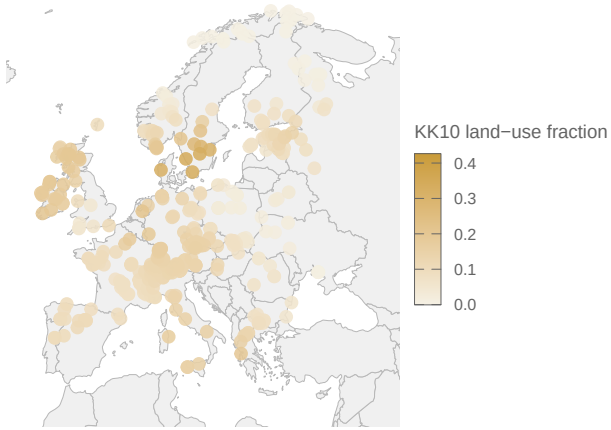
Europe (n = 387)



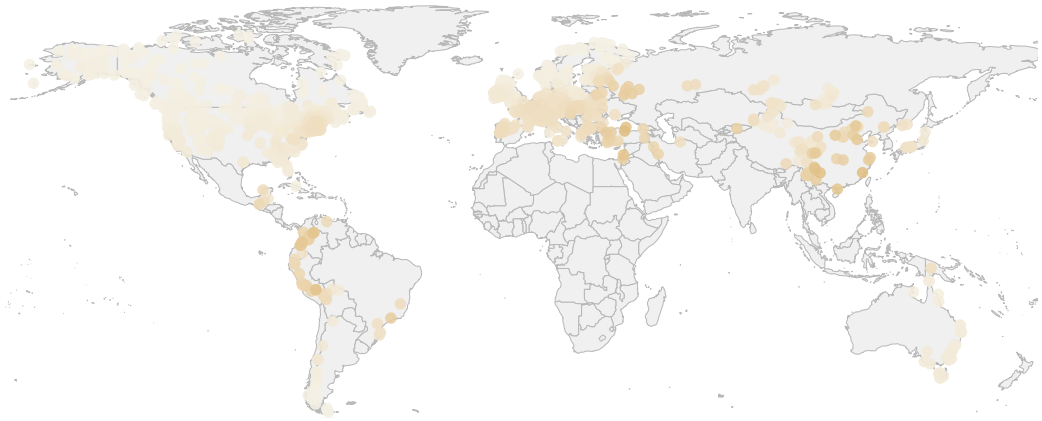
World (n = 1139)



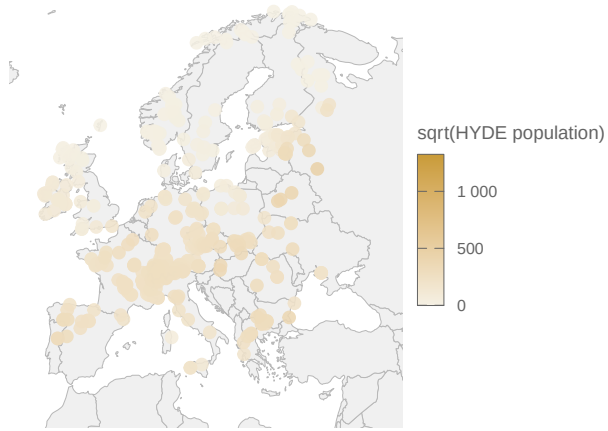
Europe (n = 387)



World (n = 1139)



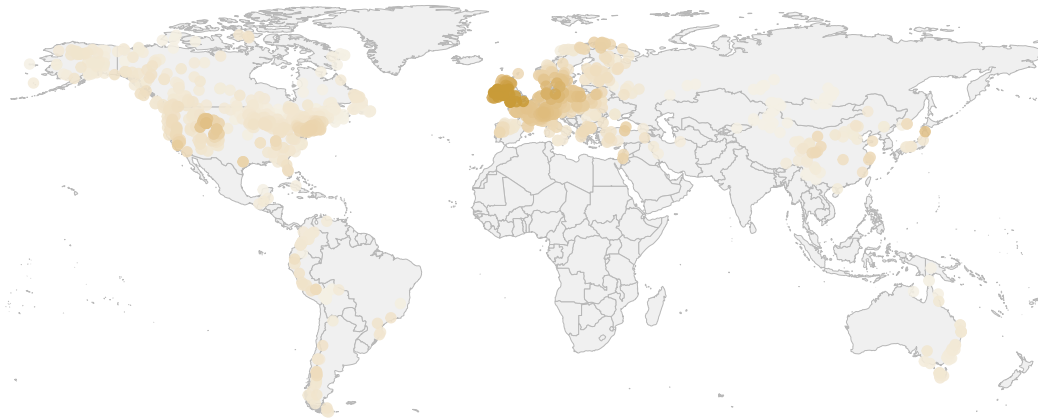
Europe (n = 387)



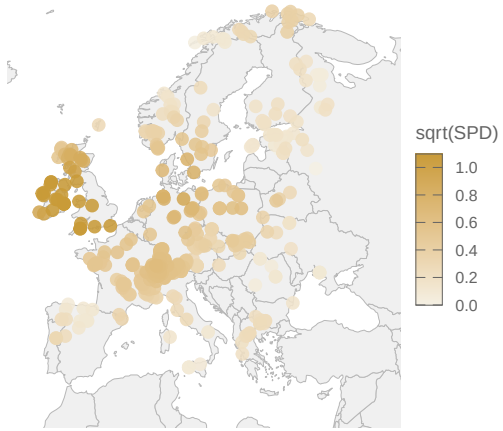
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 5.5 cal ka BP

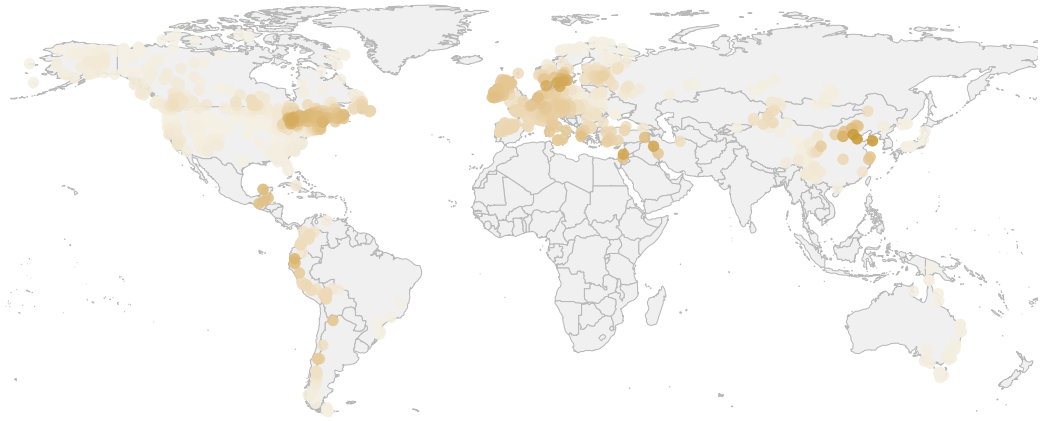
World (n = 1149)



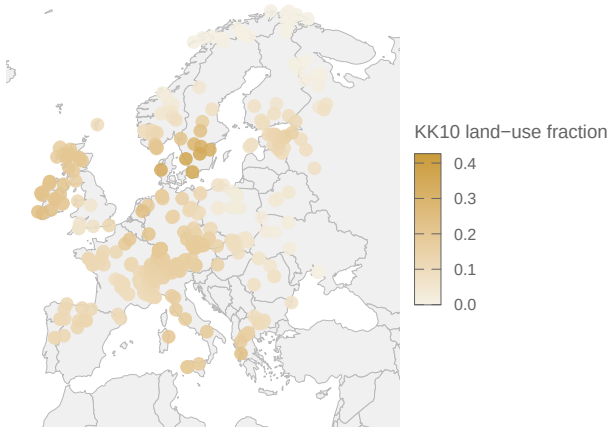
Europe (n = 385)



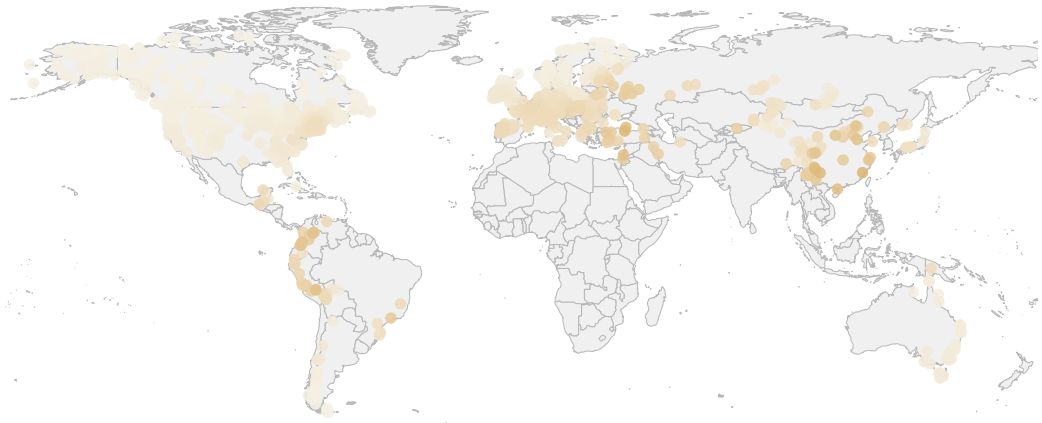
World (n = 1149)



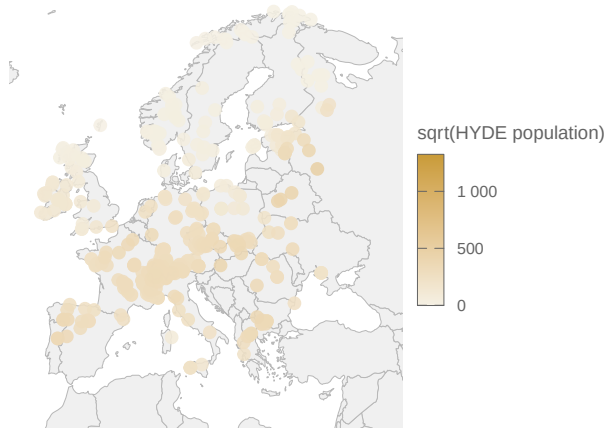
Europe (n = 385)



World (n = 1149)



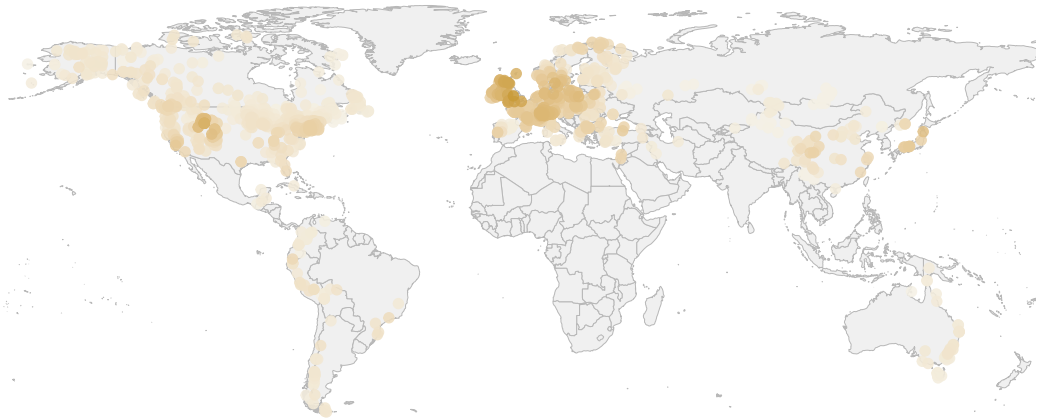
Europe (n = 385)



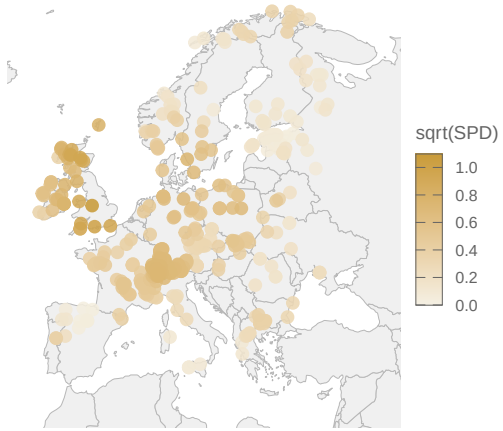
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 5 cal ka BP

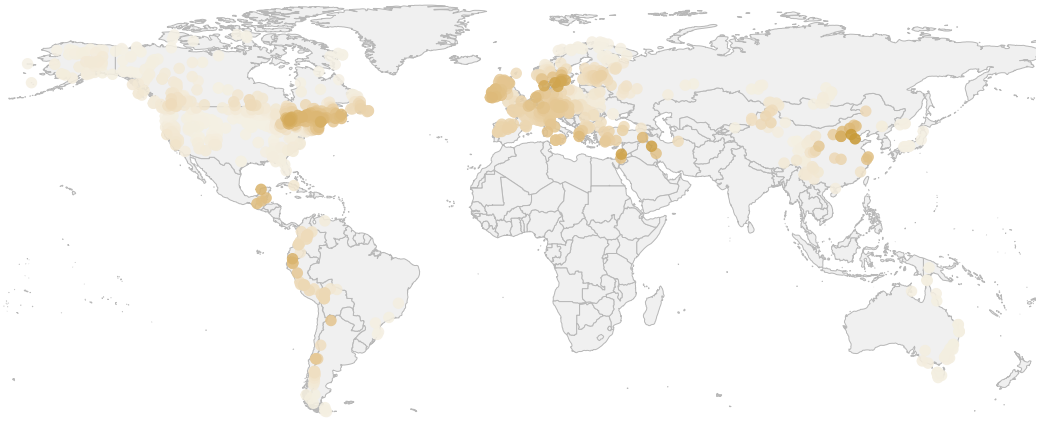
World (n = 1141)



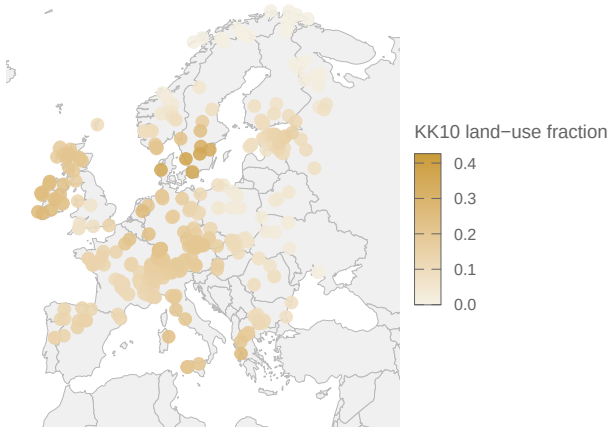
Europe (n = 382)



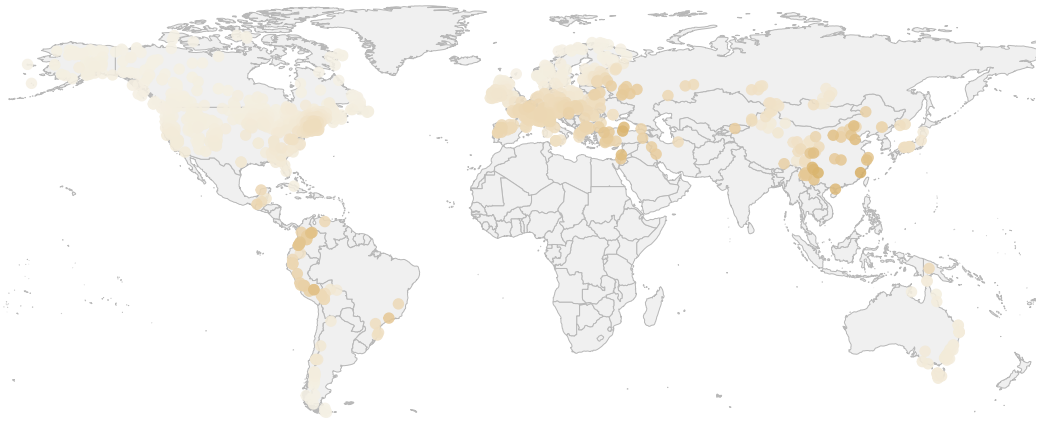
World (n = 1141)



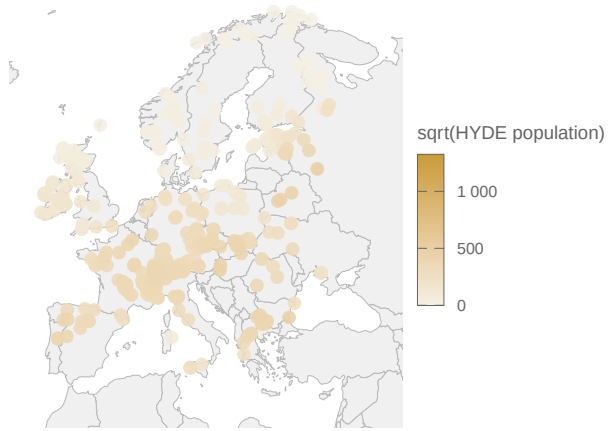
Europe (n = 382)



World (n = 1141)



Europe (n = 382)

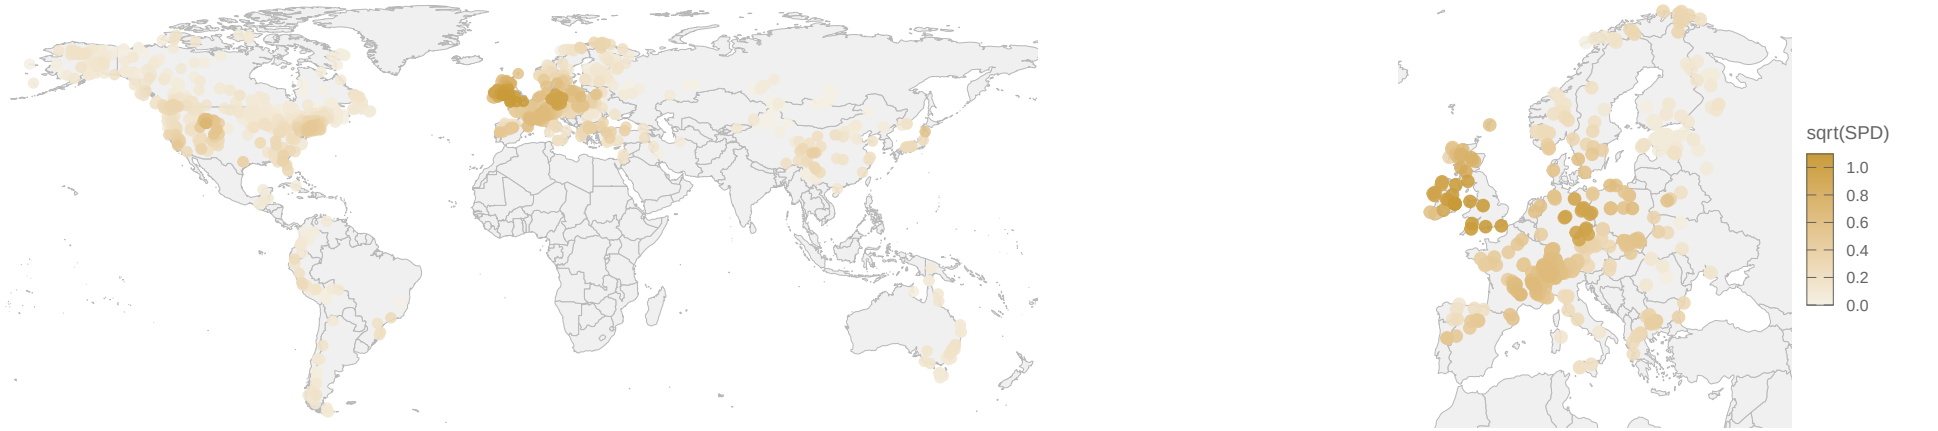


Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 4.5 cal ka BP

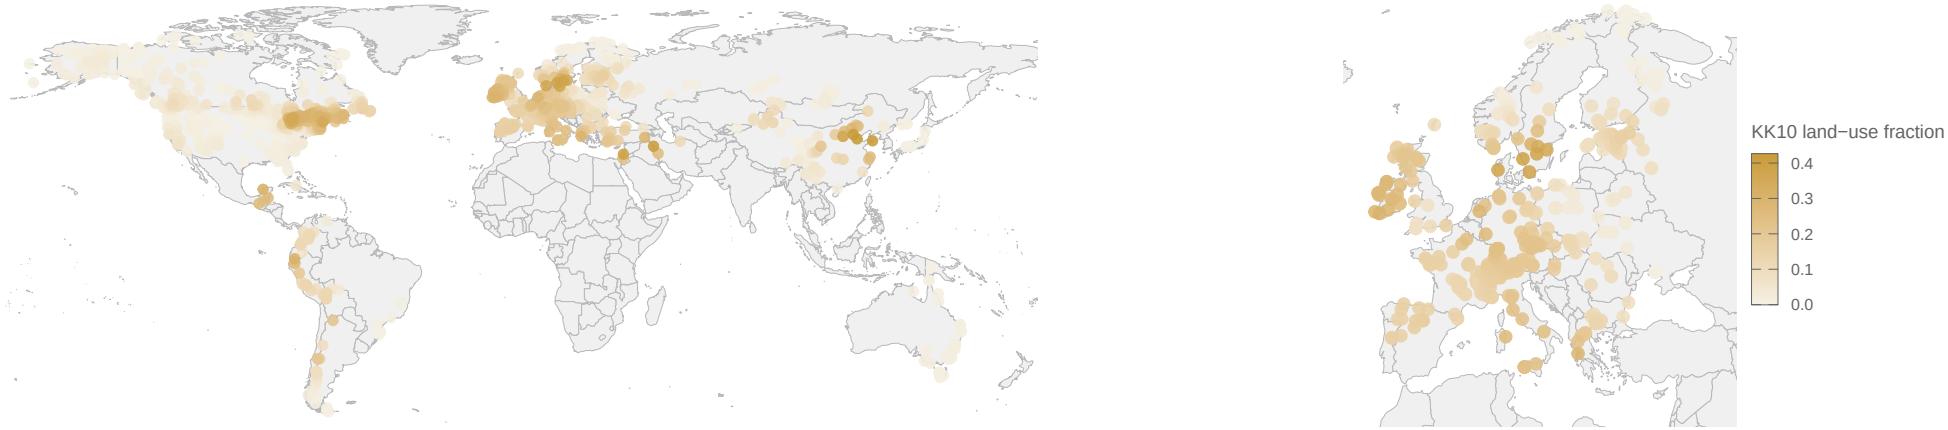
World (n = 1151)

Europe (n = 388)



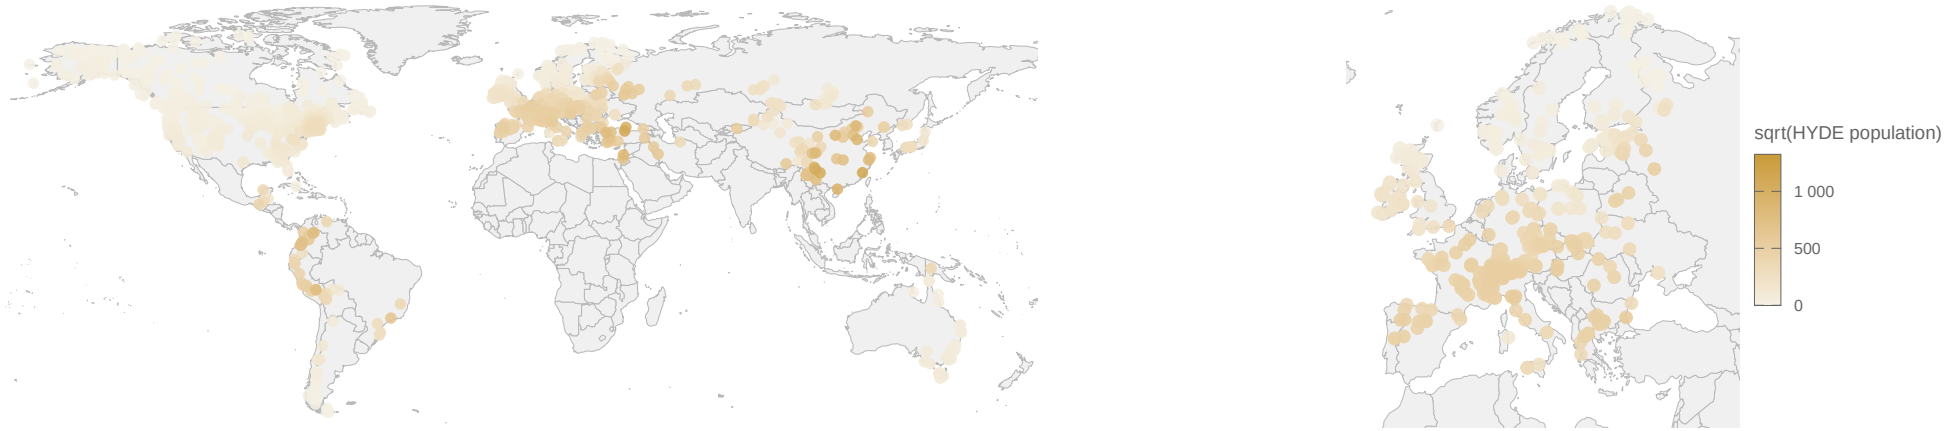
World (n = 1151)

Europe (n = 388)



World (n = 1151)

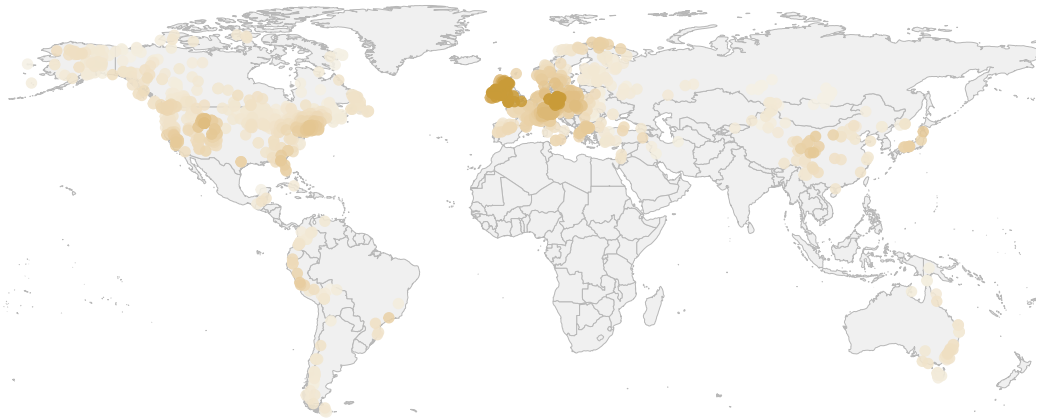
Europe (n = 388)



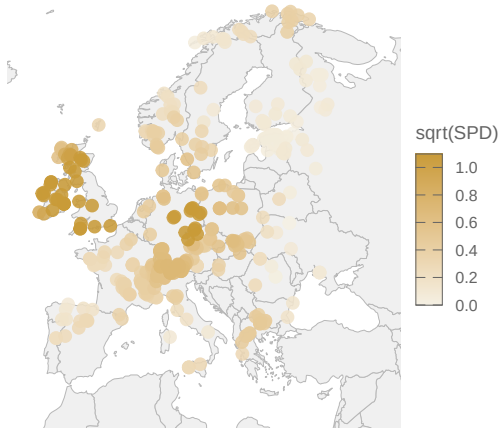
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 4 cal ka BP

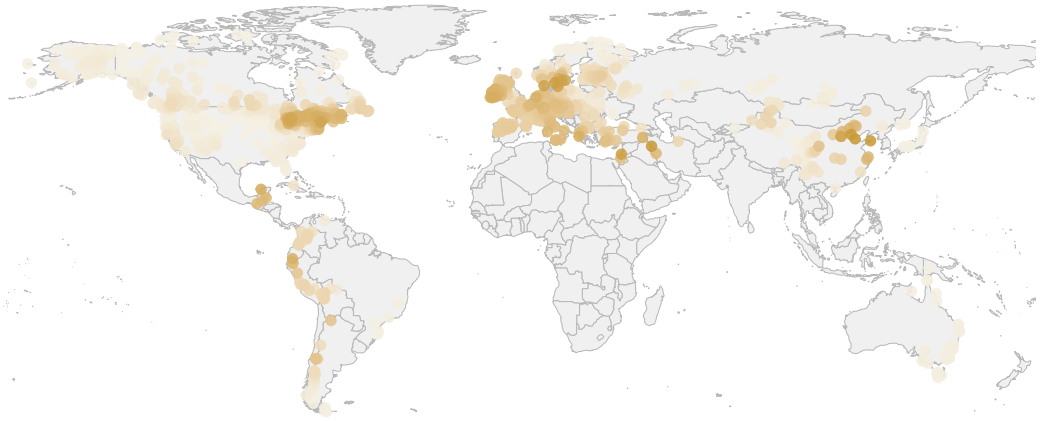
World (n = 1152)



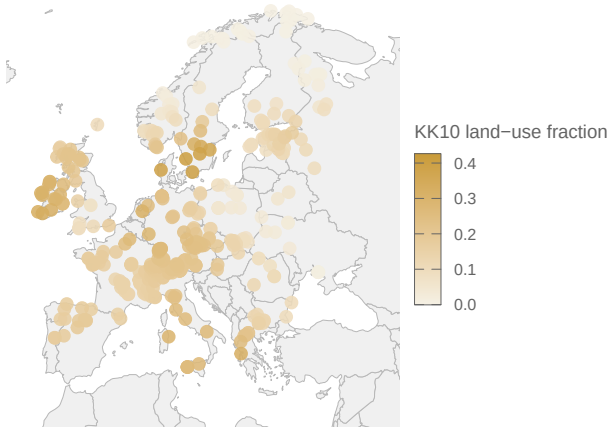
Europe (n = 387)



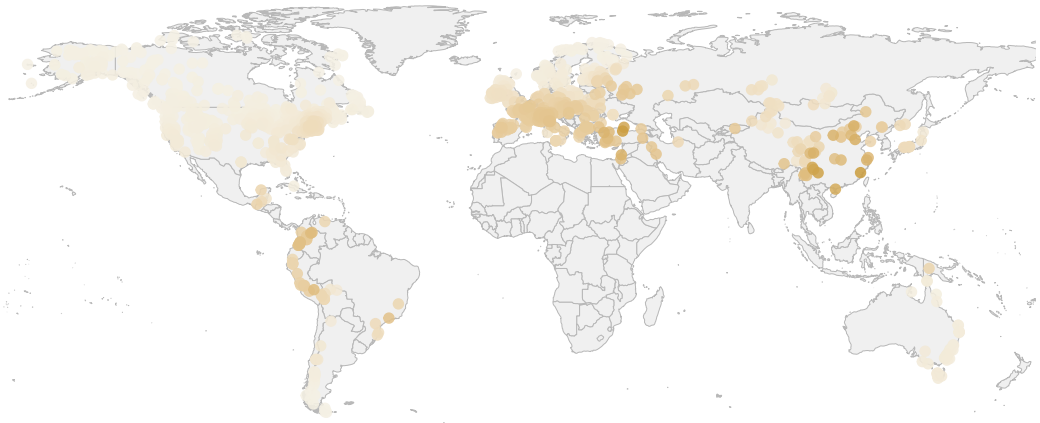
World (n = 1152)



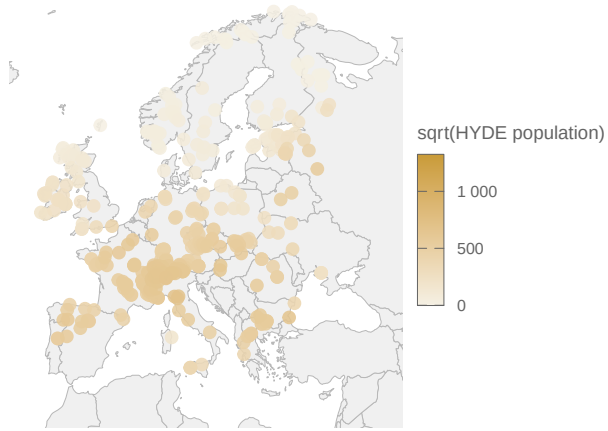
Europe (n = 387)



World (n = 1152)



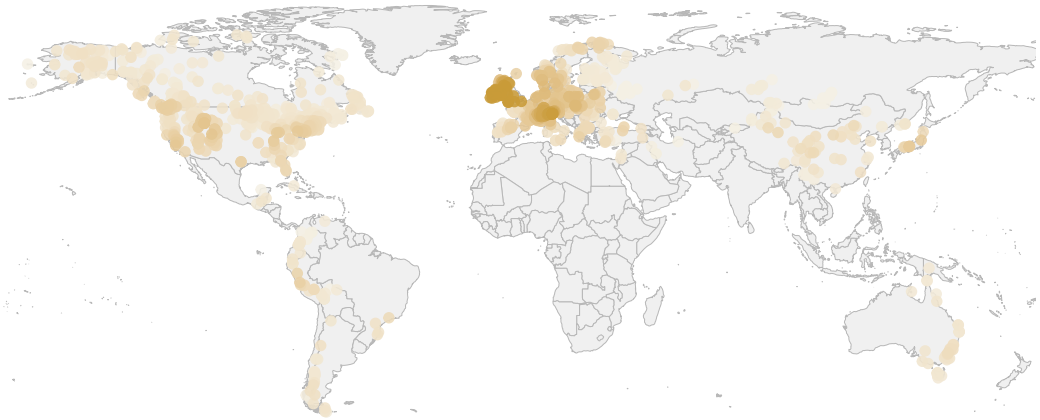
Europe (n = 387)



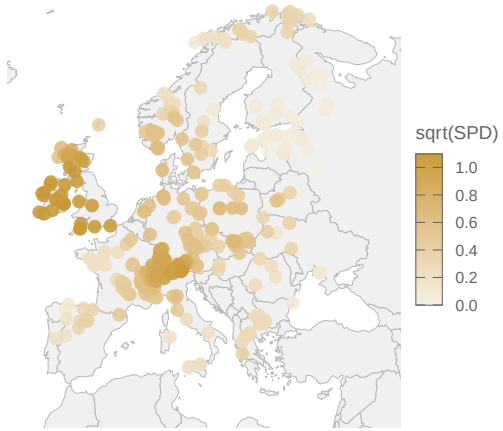
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 3.5 cal ka BP

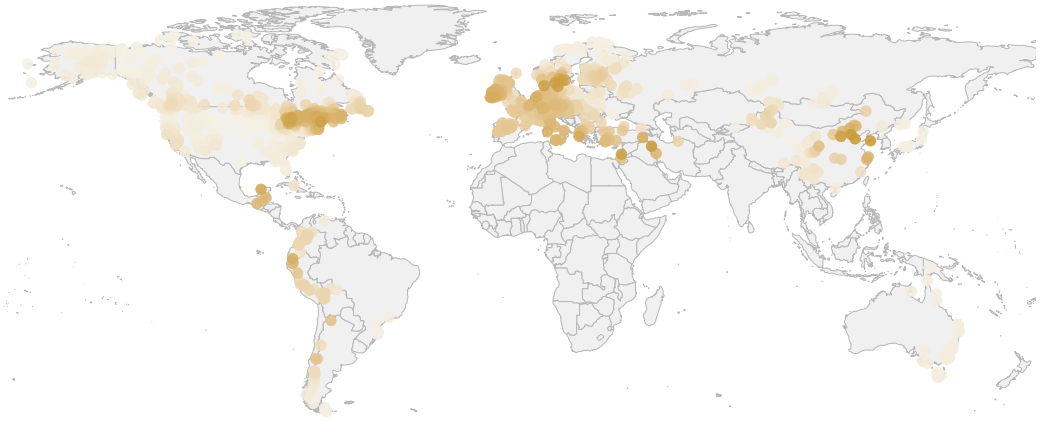
World (n = 1138)



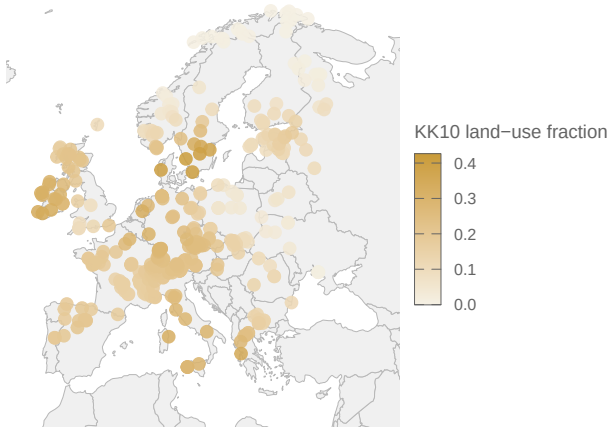
Europe (n = 382)



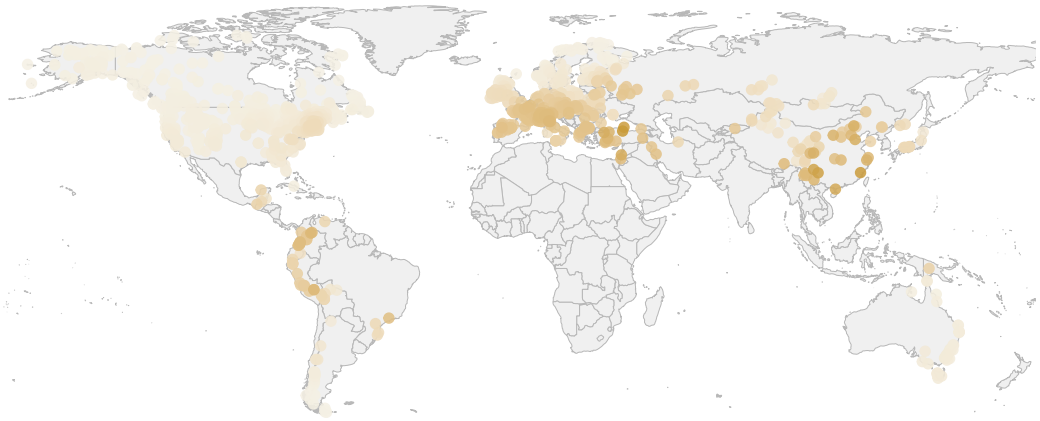
World (n = 1138)



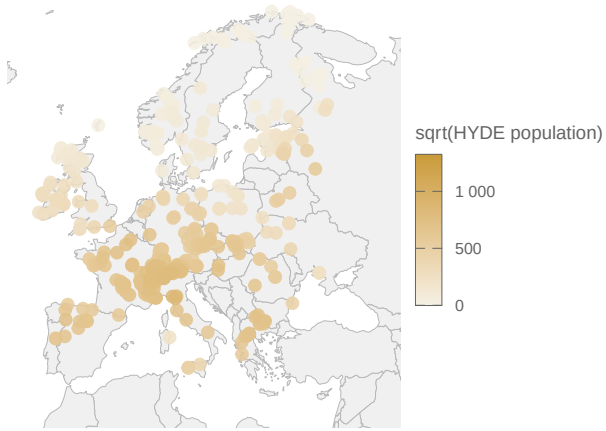
Europe (n = 382)



World (n = 1138)



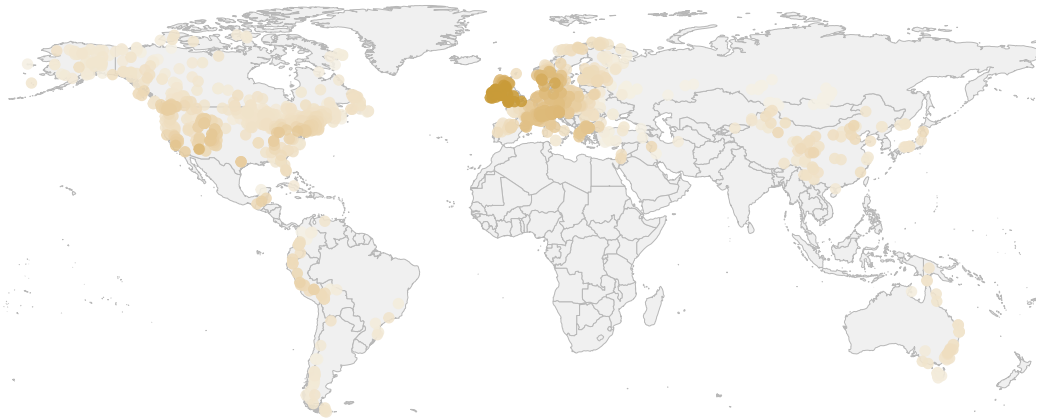
Europe (n = 382)



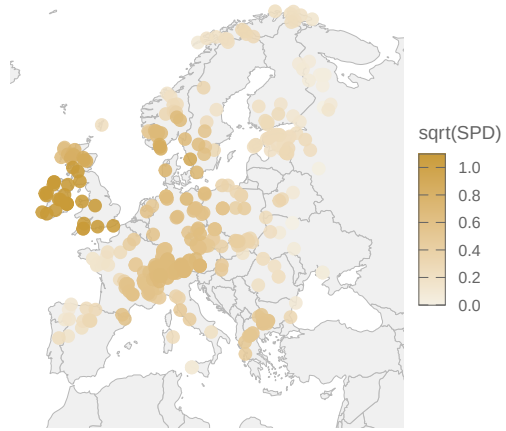
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 3 cal ka BP

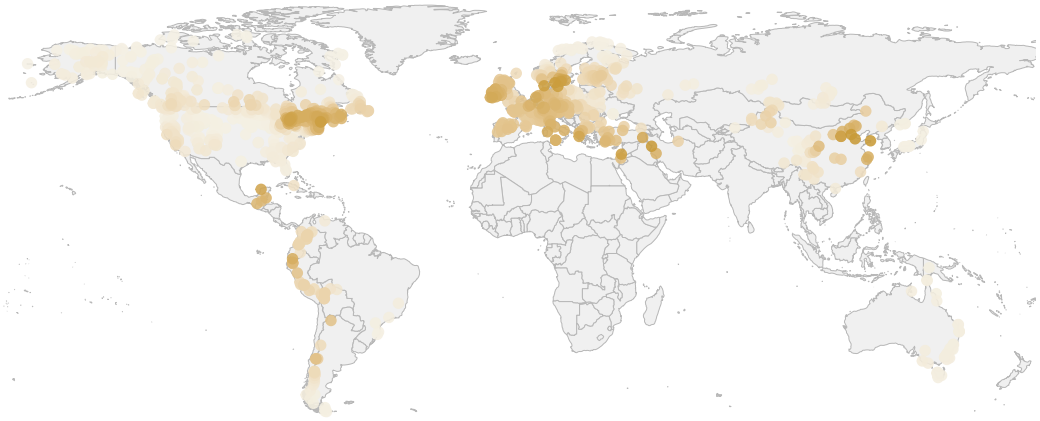
World (n = 1143)



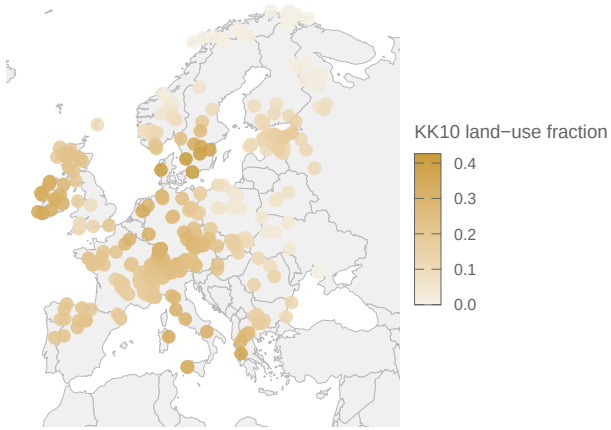
Europe (n = 387)



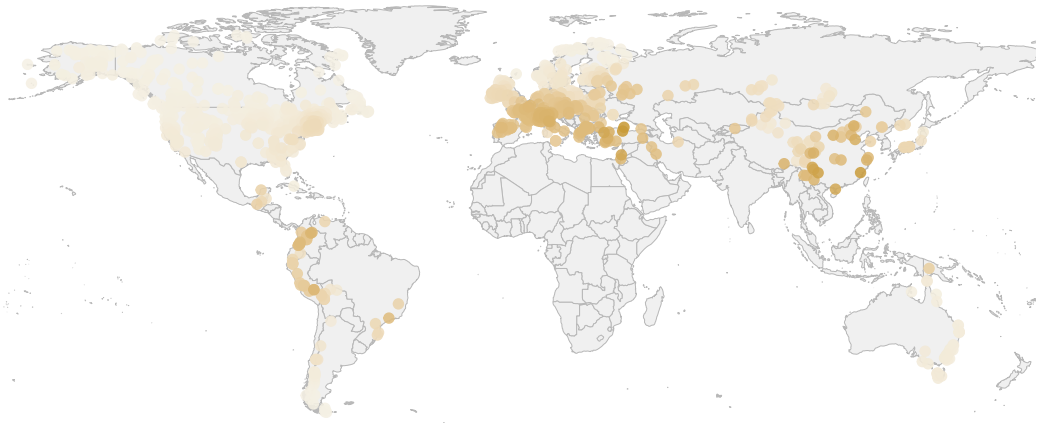
World (n = 1143)



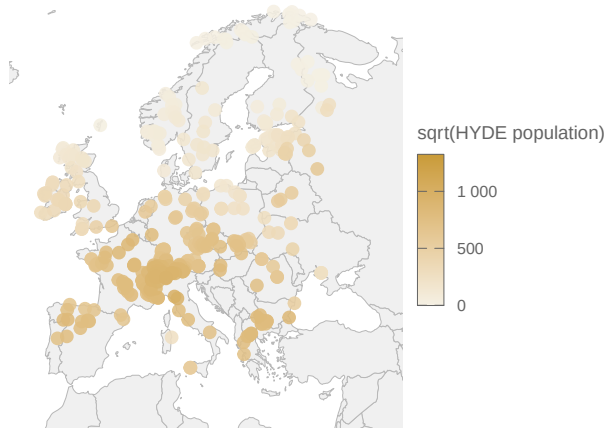
Europe (n = 387)



World (n = 1143)



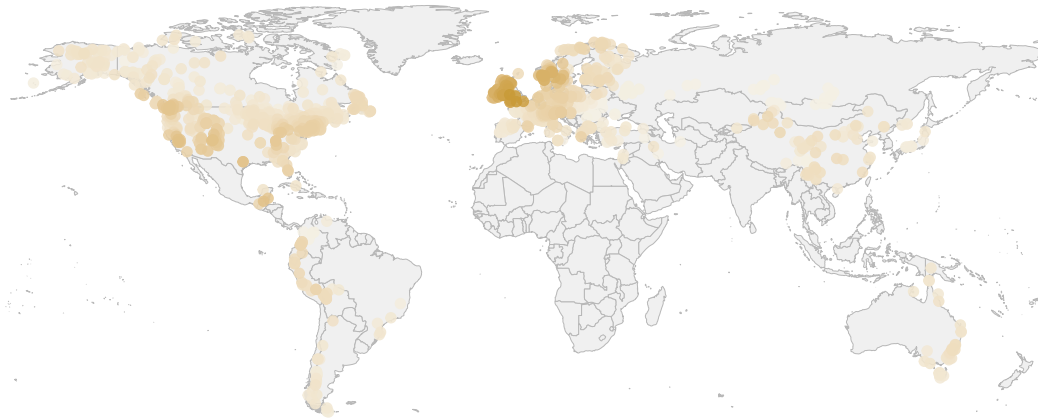
Europe (n = 387)



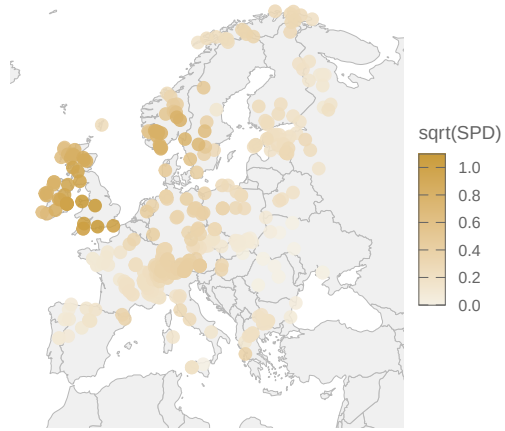
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 2.5 cal ka BP

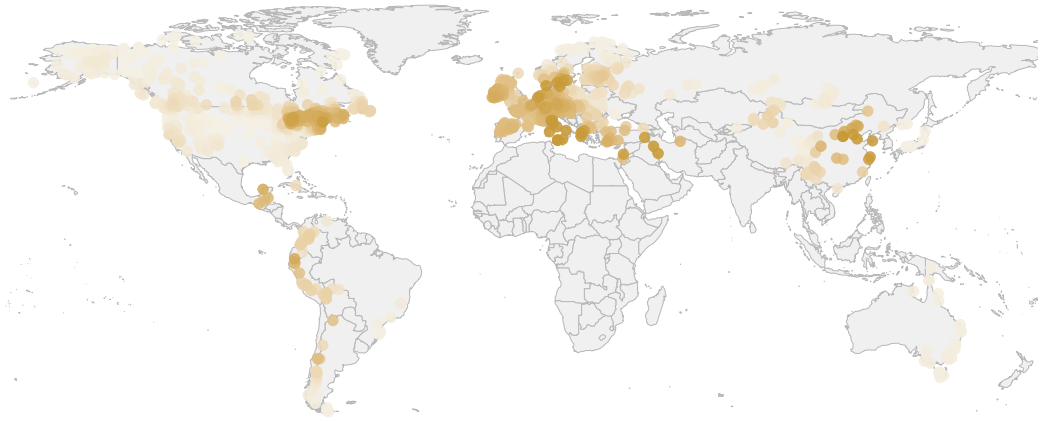
World (n = 1146)



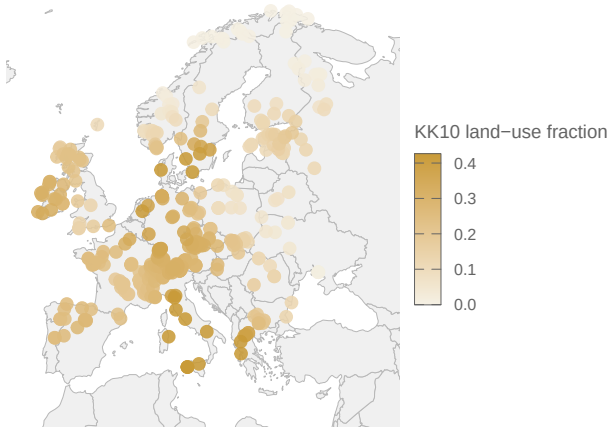
Europe (n = 392)



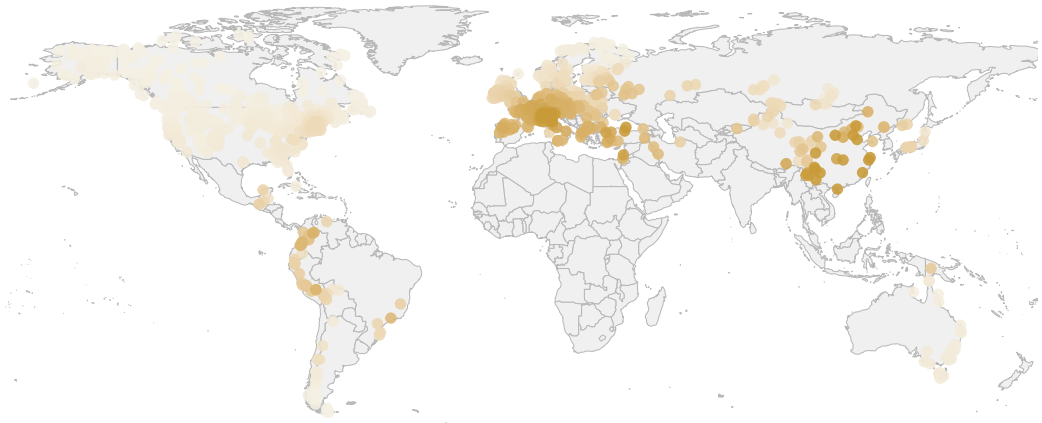
World (n = 1146)



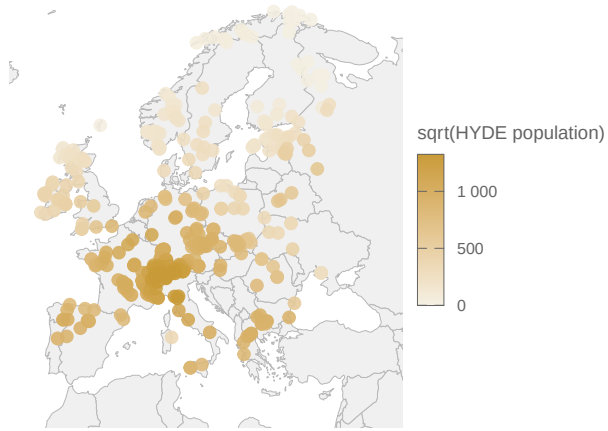
Europe (n = 392)



World (n = 1146)



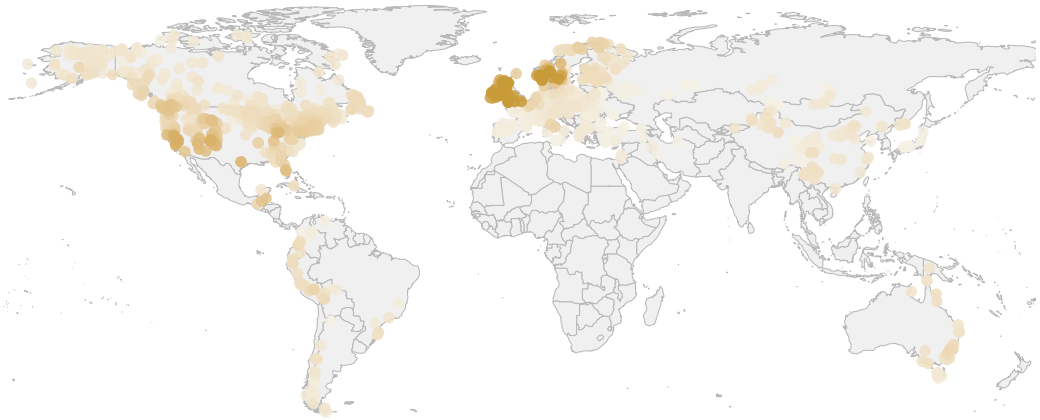
Europe (n = 392)



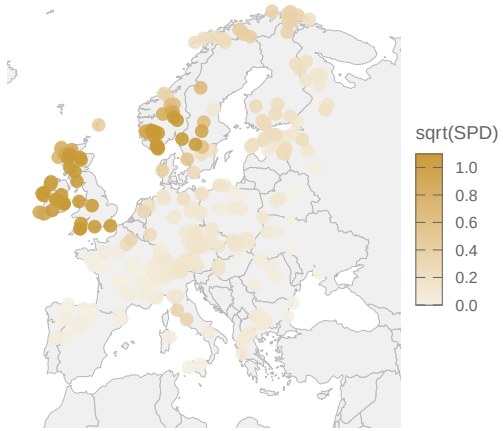
Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.

Matched human−impact proxies − 2 cal ka BP

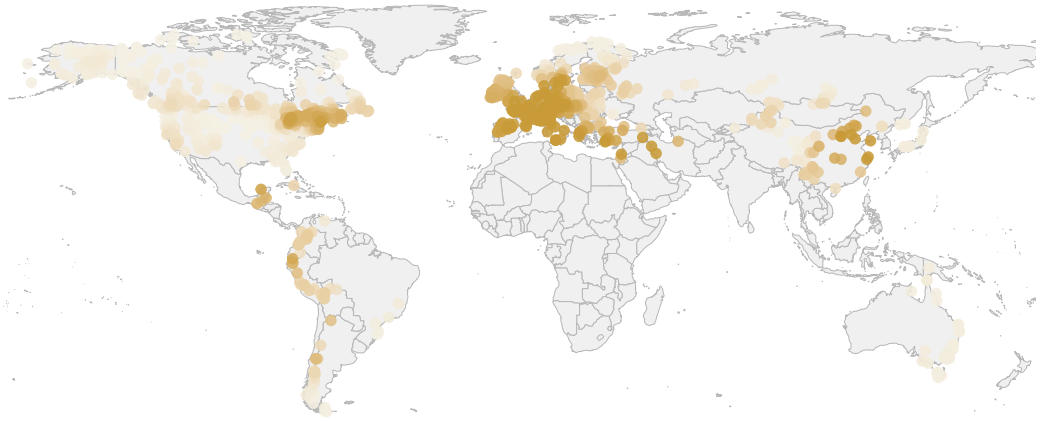
World (n = 1151)



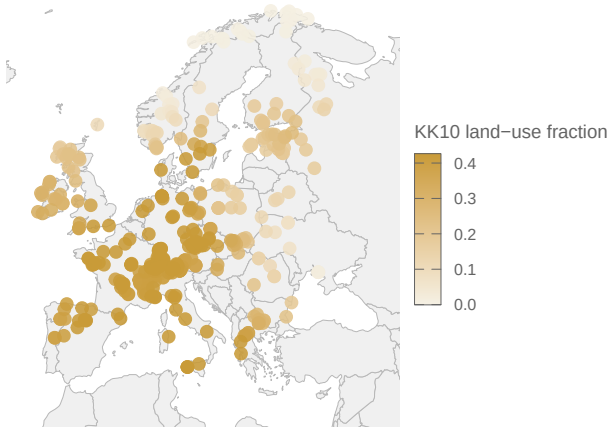
Europe (n = 389)



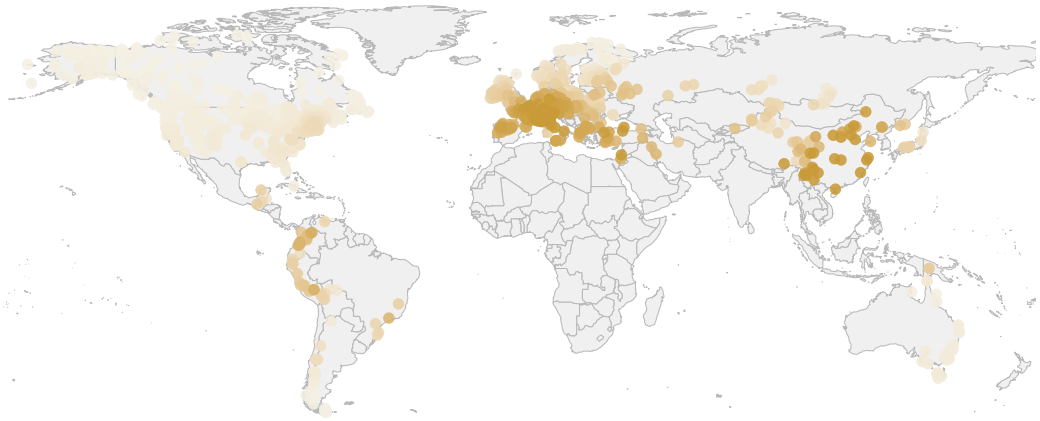
World (n = 1151)



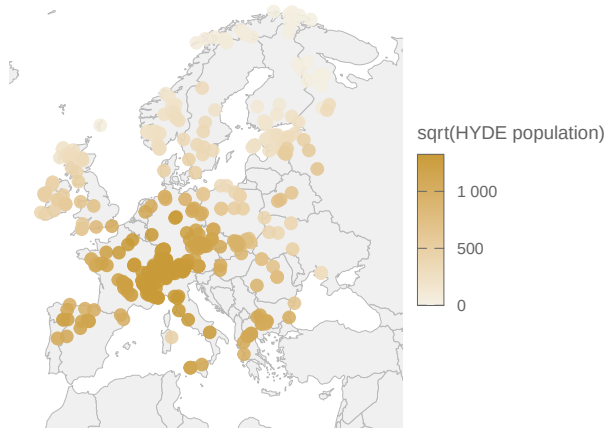
Europe (n = 389)



World (n = 1151)



Europe (n = 389)



Points are the exact matched H1 observations. Europe panels include Europe−assigned sequences only. Colour limits are fixed within proxy across all ages; values above the 99th percentile are saturated.
